Numares HEALTH

Business Strategies

numares HEALTH develops and markets integrated test systems for human diagnostics. The fully automated numares systems provide information about formation, extent and severity of diseases in high throughput operations. They ensure improved treatment options at high patient safety and cost-effectiveness.

Core Technologies and Services

numares develops and markets integrated test systems for human diagnostics. These create a detailed image of the human metabolism from bodily fluids on the basis of nuclear magnetic resonance (NMR) and numares' proprietary Magnetic Group Signaling (MGS) technology. Diagnostic tests interpret the individual metabolic images of the patient with the help of innovative software solutions and provide valuable information about the formation, extent and severity of diseases. The ability to perform different tests on the same platform in fully automated and high throughput operations shows the efficiency and cost-effectiveness of numares test systems.
