

## ***DYPHOX GmbH***

### **Business Strategy**

TriOptoTec GmbH develops and markets products and services in the area of photodynamic disinfection and decontamination, using its brand „dyphox“.

### **Core Technology and Services**

DYPHOX GmbH develops and markets products and services in the field of photocatalytic oxidation, deodorization and disinfection under the "DYPHOX" brand.

### **Patents, Licences, Cooperations**

The core technology is innovative photosensitizers that can be used in a wide range of applications. They are used as specialty chemicals, in intermediates and additives, especially for oxidation processes, or for odour elimination and deodorization, including the corresponding application processes and equipment. DYPHOX GmbH offers this platform technology for equipping material surfaces or liquids with photocatalytic properties. Consulting services can also be provided, particularly in the cleaning, chemical, microbiology and biocide sectors.

### **Distribution**

Distribution will be both direct and indirect in line with a multi-channel strategy.
