

Danumed Medizintechnik GmbH

Business Strategies

danumed Medizintechnik GmbH develops, manufactures and distributes a wide range of innovative and high-quality medical products for enteral nutrition. danumed offers its own product portfolio of enteral feeding devices and accessories as well as also offering flexible solutions to individual customer requests quickly and reliably – from the first stage of development through to CE accreditation of the final product.

Core Technologies and Services

Our focus is on enteral feeding devices with the aim to improve the functionality of conventional enteral application technology and to develop new and innovative products to enhance patient outcomes.

In addition to our own product portfolio in the field of enteral nutrition, danumed Medizintechnik designs and develops individual products in collaboration with its customers, considering all technical and regulatory aspects – from the first stage of development to the CE-marked marketable product. For every project, danumed Medizintechnik puts together the ideal project team with its own resources as well as with external specialists from its network.

danumed's quality management system is certified in accordance with DIN EN ISO 13485 and with Directive 93/42/EEC and ensures best product quality as well as quick regulatory implementation and CE marking.
