

AKTORmed GmbH

Business Strategies

AKTORmed, the German market leader in robotic assistance systems guiding endoscopes in minimally invasive surgery, boasts more than fifteen years of experience. In this context, their SOLOASSIST II platform sets an industrial benchmark regarding flexibility, functionality and operability. At present, they are addressing interventions in general surgery, urology and gynaecology. In order to achieve such a supreme performance, they have a steadily increasing network of qualified sales partners, which enables a worldwide support of clinics.

Core Technologies and Services

Their above-average outlay for development, their superior know-how and a large cooperation network help them create innovative products featuring maximum precision. The support of surgeons in minimally invasive surgery through robot-supported assistance systems forms the basis for perfect imaging, which improves safe and effective surgery. It is not a question of replacing the surgeon but of enhancing his or her skills. As an innovation-driven company, they cooperate closely with renowned universities to develop new products for further fields of application.
