## ***Kunststoff Concept Regental e. K.***

### **Business Strategies**

Kunststoff Concept Regental develops and produces innovative and high-quality injection-molded plastic products for various industries.

The manufacture of innovative products for care and therapy is an important future field for us.

### **Core Technologies**

The company focuses on the development and production of innovative and high-quality injection-molded plastic products.

Kunststoff Concept Regental supports its customers in the product development process, starting with conceptualization, design, prototype construction, tool procurement through to series production and assembly.

- Plastic injection molding (1K, 2K, overmolding technology)
- Product development (use of creative methods, etc.)
- 3D printing (hand samples, test samples, small series)
- Mold technology
- Component assembly
